Work Experience

Senior Frontend Developer

InfyStrat Software Services - Johannesburg, Gauteng

May 2021 to Present

I'm the one behind the African bank system. We maintain the system as a team. Currently we are a team of 10 on the frontend side. We use umbraco & c# but now i'm also leading my team in transitioning from c# to react.js. Some of the pages I have worked with are below:

<https://www.africanbank.co.za/en/home/product-credit-card/>

<https://www.africanbank.co.za/en/home/product-credit-life/>

<https://www.africanbank.co.za/en/home/press-releases/>

MY CURRENT SALARY IS R 45 000

Mobile App Developer

Motor Accident Group - Johannesburg, Gauteng

March 2020 to May 2021

I develop iOS and android apps (React Native Apps) for internal use of the company and also manage their internal servers. I managed to deploy an app within my first 7 days on the app store and play store.

MY CURRENT SALARY IS 23 000

Developer

Crestview Life - Rustenburg, North West

March 2019 to February 2020

Working at Crestview life was the best moment in my life since i had to develop programs with the best gurus around South Africa. We have managed to deploy multiple systems such as E-learning which is currently used by most private colleges in North West. My best system was the hospital management system which had so many features like an app which allows patients to request for their medication while seated at home.

I have to say team work is the best!

MY SALARY FOR THIS ROLE WAS: R23 000

Developer

Betterdays Technologies - Rustenburg, North West

March 2016 to August 2018

I worked as a javascript developer under a wonderful group of other nerds. We worked with big brands like telkom, sanlam, Welkom municipal, We maintained there servers and transformed their old system into modern versions.

Education

Certificate in Software development

Udemy - Johannesburg, Gauteng

Present

Diploma in Applied Information Technology

University Of Zimbabwe - Harare

June 2014 to June 2015

Awards

Best student

July 2015

Due to my own expertise and humbleness, In 2015 i was awarded "THE BEST STUDENT" award in both personality and academic(programming skills).

Publications

The LifeStyle (A hookup app)

<https://play.google.com/store/apps/details?id=com.lifestylenewapp.api>

September 2019

Done in React Native:

This is the craziest of all my apps. It allows users to request each other for services such as massage, drink mate, fake partner for your business needs or just to loaf around. Users may also book for accommodation well known as life style hotspots. We also have rides to take you where you want. Currently we have more than 10k users

smartStore

<https://play.google.com/store/apps/details?id=com.rushwallets.api>

February 2019

Done in ionic cordova:

This one is called touch not. One of my best apps with more than 10k downloads, 5 star ratings and 84 positive reviews and 2k-4k daily active users(👍👍). This multi vendor, mobile point of sale, self-checkout system, Yeah this feature allows big supermarkets to allow their customers to perform self-services that is a customer can enter into a store, pick whatever he/she wants to buy, scan its barcode to place on cart, scan credit card for payment using his/her smartphone then exit the store without going to the cashier. For security reasons the app will generate the receipt. It is wise to check it out or read more on <https://smartstoreweb.net/>

We Finance Group

<https://wefinancegroup.org>

January 2021

Done in react js:

This is an investment and loan platform. It allows loan sharks to easily get clients. The app has processed more than R500K ever since it started.

Additional Information

I'm pretty awesome when it comes to javascript and its frameworks. I always want to be the best among others. I have to admit, its very bad and yet the truth and this is why I'm 70% half way into completing my own serverless framework. My wish is to eliminate the back-end and css skills and bring developers to one javascript framework.

Apart from my technical skills I'm also a good guy you know? When it comes to ideas i dare you to challenge.

Enough about me, Tell me more about your company via email ("info@empiredigitals.com"), lets see if i deserve to be one of you.
